Overcome Foreign Trade Complexities

Using SAP S/4HANA International Trade Management

International Trade Management has become more complex than ever due to the ever-changing trade compliance requirements and the rapidly expanding networks of foreign traders and supply chain partner ecosystem. Add to that the increasing demand for speed and frictionless transactions of both B2B and B2C customers as well as the growing skills gap.

Why SAP S/4HANA International Trade Management

SAP GTS has been a helpful tool for businesses that want to simplify their global trade processes. But customers that have already migrated or planning to migrate to S/4HANA can take advantage of a S/4HANA embedded foreign trade management solution to reap the unique benefits that S/4HANA provides.

SAP S/4HANA International Trade Management is a foreign trade module for operation on the SAP S/4HANA platform. It empowers businesses to ensure legal compliance, manage International Trade activities integrated into their supply chain, and reduce work effort through automation.

Key Features

International Trade Classification

Optimize product classification with Intrastat service codes, commodity codes, and Customs Tariff Numbers. Enable product classification with control classes and control groupings for legal control. Allow for management of classification data from external data providers.

International Trade Compliance

Enhance control of statutory regulations for import and export. Efficiently manage countries/regions under embargo. Simplify the management of licenses in accordance with legal control for import (purchase orders and stock transfer orders) and export (sales orders and deliveries). Automate the management and release of blocked legal control documents for more streamlined trade compliance.

Intrastat

Optimize the management of Intrastat declarations and their master data.

Integrations

Integrate SAP S/4HANA International Trade Management with SAP GTS to take advantage of GTS functionalities in your processes. By integrating it with the SAP Watch List Screening application, you can automate the screening of names and addresses for sales orders, outbound deliveries, purchase orders, and purchasing contracts, allowing you to remove unnecessary friction.

Key Benefits

| Simplified data model for greater scalability, flexibility, and agility	Fiori-based user experience, allowing all LOBs to easily manage foreign trade	Advanced capabilities like embedded Analytics and Artificial Intelligence (AI)	Automated key processes for more seamless and cost-efficient international trade management

Why Ropaar

The success of your SAP S/4HANA International Trade Management project depends on who your implementation partner is. We at Ropaar do not provide our clients with canned and cookie-cutter solutions. We study your business thoroughly so we can provide you with the right solutions to your unique problems and issues. We offer relational — rather than transactional — customer engagement.
