

Trade With Confidence

Using SAP Global Trade Services (GTS)

Today's B2B and B2C customers are looking beyond borders to purchase products, expecting vendors to help them get the best prices and deliver products without delays and unnecessary friction. But global trade compliance remains a huge roadblock in meeting customer demand.

Why SAP GTS

SAP Global Trade Services (GTS) empowers you to trade with confidence. SAP GTS is a complete suite of solutions for global trade management that empowers you to automate, standardize, centralize, and manage global trade compliance requirements for smoother and faster global transactions. With SAP GTS, you can drive consistency across global operations, elevate global trade in your organization, automate trade compliance, and drive bottom-line savings.

Key Features

Next-Generation Export and Import Management

Take advantage of automation and direct filing to effectively manage export/import compliance, minimize logistics and brokerage charges, and improve product classification.

Simplified Trade Preference Management

Strategically leverage free trade agreements, maximize eligible products through preference determination, and efficiently manage vendor declarations.

Adaptive Customs Management

Leverage FTZs, support region-specific duty minimization, deferral and avoidance regimes and meet Intrastat and Excise movement requirements.

Data-Driven Restricted Party Screening

Optimize screening of denied or restricted parties to avoid global trade violations and delays.

Key Benefits

Flexibly adapt and meet region-specific customs requirements.

Increase visibility into global transactions.

Standardize and automate processes.

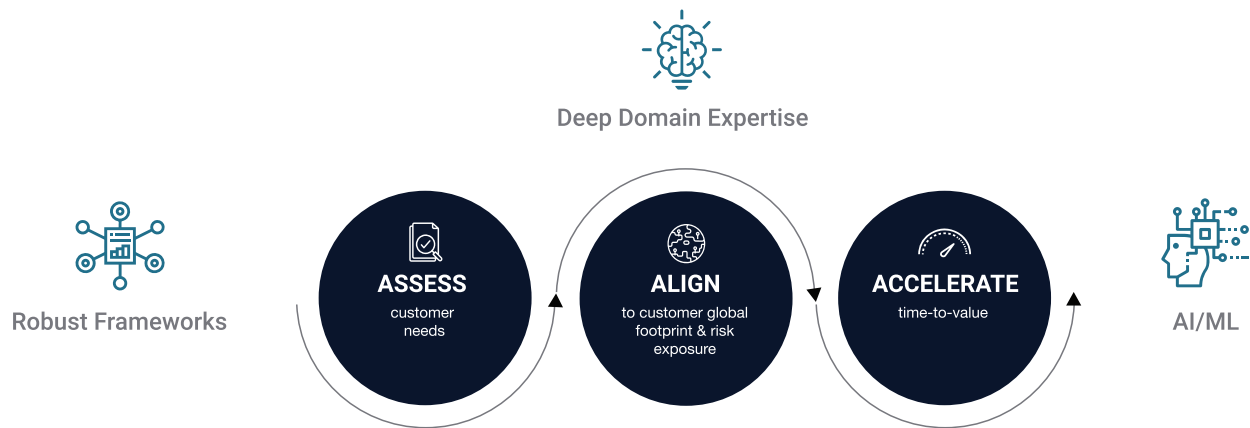

Minimize delays and contain costs.

Why Ropaar

The success of your SAP GTS project depends on who your implementation partner is. We at Ropaar do not provide our clients with canned and cookie-cutter solutions. We study your business thoroughly so we can provide you with the right solutions to your unique problems and issues. We offer relational – rather than transactional – customer engagement.
