

Enable Frictionless Transportation Activities

Using SAP Transportation Management (TM)

To meet new demands, transportation leaders must strategically utilize their assets, digitize their processes, and proactively mitigate risks that can lead to delays, inefficiencies, and inaccuracies. Without a robust Transportation Management solution in place, it is difficult to operate in an ever-increasing competitive market.

Why SAP TM

SAP Transportation Management (TM) offers holistic and innovative transportation management and comprehensive process and multimodal coverage. With SAP TM, you can optimize order management, freight planning, freight monitoring, and execution. SAP TM's powerful analytics capabilities empower you to maximize asset use and control freight costs without negatively impacting the customer experience.

Key Features

Automated Order Management

Improve the efficiency of order and process management through automation and standardization. Create rules-based routing proposals aimed at minimizing freight costs and enhancing customer service.

Data-driven Transportation Planning and Execution

Fully harness data to improve resource utilization and carrier selection, significantly reduce transportation costs and achieve right-time delivery. Eliminate manual activities to increase accuracy, efficiency, and speed.

Strategic Freight Costing and Settlement

Maximize the return on transportation spend through automated freight settlement, consolidation, and negotiation with simulation and what-if analysis. Improve transparency and accuracy using automatic transportation cost calculation and integrated transportation management and billing.

Real-time Analytics And Reporting

Enable real-time, data-driven decision-making using real-time analytics and flexible reporting. Use intuitive dashboards and graphical visualizations to easily understand real-time transportation events and proactively mitigate risks.

Key Benefits

Seamlessly integrate core supply chain and business processes.

Automate and standardize order management and transportation planning.

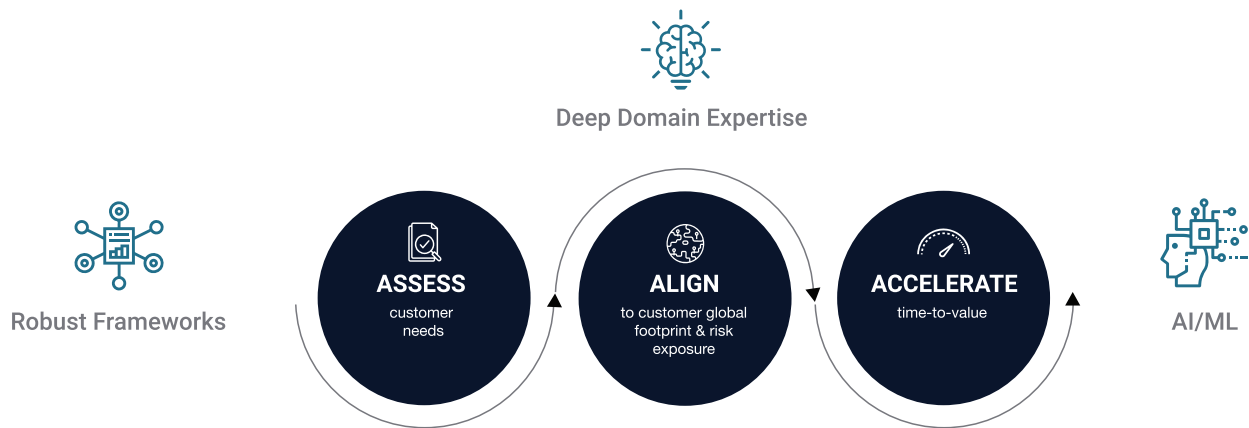

Obtain end-to-end visibility into transport activities.

Why Ropaar

The success of your SAP TM project depends on who your implementation partner is. We at Ropaar do not provide our clients with canned and cookie-cutter solutions. We study your business thoroughly so we can provide you with the right solutions to your unique problems and issues. We offer relational – rather than transactional – customer engagement.
